DETAILED ACTION

Claim Rejections - 35 USC § 101

1. Claims 1-5 are rejected under 35 U.S.C. 101.

Further, despite the express language of §101, several judicially created exceptions have been established to exclude certain subject matter as being patentable subject matter covered by §101. These exceptions include “laws of nature,” “natural phenomena,” and “abstract ideas.” See *Diamond v. Diehr*, 450, U.S. 175, 185, 209 USPQ (BNA) 1, 7 (1981). However, courts have found that even if an invention incorporates abstract ideas, such as mathematical algorithms, the invention may nevertheless be statutory subject matter if the invention as a whole produces a “useful, concrete and tangible result.” See *State Street Bank & Trust Co. v. Signature Financial Group, Inc.* 149 F.3d 1368, 1973, 47 USPQ2d (BNA) 1596 (Fed. Cir. 1998). This addresses the second test under 35 U.S.C. 101 of whether or not an invention is eligible for a patent. The Manual of Patent Examining Procedure reiterates this point. More specifically, MPEP 2106(II)(A) states, “The claimed invention as a whole must accomplish a practical application. That is, it must produce a ‘useful, concrete and tangible result.’ *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02.” Applicant is merely providing rules of play without actual play of the game. The playing field, goals and ball are merely ancillary features of the claim which are not truly part of applicant’s invention. The invention is the rules of play, which are simply abstract ideas.

In conclusion, the Examiner submits that Appellant’s claims do not meet the requirement under 35 U.S.C. 101.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the a spherical shaped ball must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: on page 1, line 28, "wildly" should be changed to --widely-- before "popular". Appropriate correction is required for the above objection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor, Jr. (5,328,191).

Regarding claim 1, Taylor, Jr. discloses a method of playing a game on a field such as a basketball court (see column 6, lines 2-6), wherein the playing field has first and second end lines, and a first and second pair of goal posts forming a rectangular-shaped scoring area, the goal areas are similar to a hockey or soccer goals; providing first and second teams having the objective of moving a ball toward the opponents goal by dribbling and scoring points by kicking the ball into the opponents goal; the method of play is the same as the basic play of soccer (see column 5, lines 38-47) the game can be ended either by setting a predetermined play time or a predetermined amount of points scored by one team.

Regarding claim 2, Taylor, Jr. teaches that the method of play is the basic play of soccer. In a typical game of soccer a player of one team passes the ball to a player of the same team when confronted by a player of another team.

Regarding claim 3, again Taylor, Jr. teaches that the method of play is the basic play of soccer. In a typical game of soccer each goal is protected by a goalie.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor, Jr. (5,328,191).

Regarding claims 4 and 5, Taylor, Jr. does not expressly disclose that the kick off can be made from the end line when the other team scores a point nor does Taylor, Jr. expressly disclose that the other team must be at least 25 feet from the end line during kick off. As it is well known many new games emerge as a derivative or variation of some existing game or combination of games. Therefore, there is nothing unobvious about combining rules, from soccer, football, handball and/or basketball to derive at the claimed limitations.
